Teeth Whitening Options

I. Opalescence Go - \$125

The professional alternative to over-the-counter whitening options. It's a simple, fast, and easy way to start a whitening treatment or for whitening touch-ups. With no impressions or custom trays necessary, it is ready to use right out of the package! Wear 30–60 minutes for 5 to 10 days.

II. Take Home Trays – Dual arch: \$325 Single arch: \$250

If you have had some success with over-the-counter whitening products, this may be the option for you. It's actually a step up from the over-the-counter systems due primarily to the delivery method, which is able to hold the whitening agent against the teeth more successfully. An impression of your teeth is taken and custom trays are fabricated. The whitening agent is dispensed and comes in Daytime or Nighttime products. **Night White** is to be used at least 4 hours overnight, while **Day White** is for 30 minutes during the day until desired results are achieved (1-2 weeks). Both come with 4 whitening syringes. Additional 4 syringe refill packages are \$30.

III. 1 Hour In-Office Power Bleaching – Dual arch: \$425 Single arch: \$350

For those who do not like wearing the trays, 1 Hour In-Office Power Bleaching may be your treatment of choice. A protective barrier is placed over the gums and two 20 minute treatments of 35% hydrogen peroxide are completed. This procedure is comparable to Zoom, but uses chemical activation instead of light activation. Desensitizers are used before and after treatment.

IV. Take Home Trays with 1 Hour In-Office Power Bleaching – Dual: \$525 Single: \$450

For more predictable results with the 1 Hour In-Office Power Bleaching, a combination of option II and III is recommended. The trays can be used before or after the Power Bleaching session and can help keep your teeth white over time.

V. 1 Hour In-Office Power Bleaching DOUBLE – Dual arch: \$625 Single arch: \$550

This is Option III done on consecutive days. The second session allows the bleach to penetrate the tooth more effectively resulting in better outcomes.

VI. Take Home Trays with 1 Hour In-Office Power Bleaching DOUBLE – Dual: \$725 Single: \$650

Combination of option II and V. The trays allow you to maintain your new WHITE smile.

VII. Deep Bleaching – MAX – Dual: \$1025 Single: \$850 , ULTRA – Dual: \$1225 Single: \$1050 ULTRA-T – Dual: \$1425 Single: \$1250

Deep Bleaching is the most effective teeth whitening system ever developed. The Max or Ultra or Ultra-T depends on the initial shade of your teeth. If you have never been able to bleach your teeth or have never been satisfied with the results, this is your answer! This is the most predictable technique we offer. The first visit is for a scan which is sent to our lab in California for the custom tray fabrication. These trays differ from option II because they are made from a more accurate scan. Therefore, they fit against the teeth more precisely, making them more comfortable to wear. During the second visit, the fit of the trays is confirmed and the process is explained in detail (Max). And, an in-office conditioning visit is performed for the Ultra and Ultra-T. Then, the trays are worn overnight for the next two weeks (3-4 weeks for the Ultra and 6-8 weeks for Ultra-T). The final visit is what we like to call the "WOW" visit, which consists of the final in-office whitening session. The Deep Bleaching package also comes with at-home desensitizers, a patient instructional video, and a tray case. While you are in treatment (prior to the final in-office visit), whitening syringes are included (3 syringes for Max, 6 syringes for Ultra, 10 syringes for Ultra-T). Additional at home whitening syringes may be purchased for \$45.
